PROFILE

Co-ran an AI software company for mid-market manufacturers, owning product direction, commercial strategy and customer delivery alongside a technical co-founder, and shipping software that took real hours out of customers' weeks. Before that, three years inside C2 Montréal and C2 Studios, where I led group sales, owned the CRM platform migration, and worked on studio pitches for accounts including FIFA and Shoptalk. What I want next is to build product with a highly effective team, somewhere my events industry background is directly useful.

EXPERIENCE

Co-founder & COO · Bridge2AI

Vancouver / Montréal · 2025 to April 2026

- **Company Leadership:** Co-ran an AI software company serving mid-market manufacturers (\$10M to \$500M+ revenue) alongside the technical co-founder, owning product direction, commercial strategy, hiring and customer delivery. Came out of the Althra accelerator program.
- **Product Direction from Zero:** Ran discovery directly with plant managers and floor operators, decided what got built, and specced it with engineering. Shipped 9 solutions across planning & scheduling, data & intelligence, AI & knowledge, and automation & integration, with 6 running in production at customer sites.
- **Flagship Customer Results:** At a \$50M geotechnical equipment manufacturer with 3,000 active SKUs, cut weekly production planning from 16 hours to 2, reduced lead times by 33%, increased production capacity by 20%, enabled 50% of orders to ship early, and generated \$80K in annual savings within six months.
- **Revenue & Deployments:** Closed \$300K in signed contracts, with production deployments at RST Instruments and Orica Digital Solutions, and a pipeline of 10 factories.
- **Vertical AI over General-Purpose Tooling:** Built a natural-language interface letting factory operators query production data in plain English, and an AI SOP generator turning tribal knowledge into searchable procedures. Modular design plugged into existing systems (Epicor, FileMaker, SAP) with no rip-and-replace.
- **Industry Recognition:** Featured in EP&T Magazine and named one of Techcouver's 10 homegrown B.C. startups to watch in 2026.
- Exited when my co-founder and I decided to go separate ways.

Sales Enablement & Operations Specialist · C2 Montréal / C2 Studios

Montréal · 2022 to 2024 (promoted from Group Ticket Sales Representative)

- **CRM Transition Lead (ActiveCampaign to HubSpot):** Managed the end to end migration, creating internal buy-in, a data nomenclature and SOPs for CRM usage across teams, and leading training for over 20 users. Improved data accuracy by 20%, cut CRM-related errors by 35%, and boosted CRM adoption among sales reps by 60%.
- **Operational Efficiency:** Automated 40% of reporting responsibilities initially assigned to the role, saving over 100 hours annually across the team.
- **Data-Driven Sales Process Optimization:** Built and maintained four custom dashboards for CEO, VP and sales team, enhancing data visibility and improving forecast accuracy by 30%.
- **Exceeded Group Ticket Sales Goals:** Surpassed sales objective by 33%, generating \$302K in ticket sales against a \$225K target by engaging directly with high-value prospects through tailored email marketing and discovery calls.
- **Exclusive Programming & Executive Engagement:** Supported the XO program, a lead development event track for the event studio's top leads on \$1M+ accounts, assisting in data management and executing targeted communications, and organizing side events and exclusive tours. Contributed to a 10% conversion rate of XO attendees into paid clients.
- **Custom Event Programming & High-Value Account Support:** Developed personalized programming for VIP clients and supported account managers with major accounts, including high-profile delegations from La French Tech and Dubai.
- **Agency Pitch Development:** Worked directly on studio pitches for accounts including FIFA, Hannover Messe and Shoptalk, owning the strategic market intelligence (veille stratégique) and narrative development, and feeding research and concept input to the creative team that led the event concepts.

- **Startup Initiative:** Organized two "Startup Nights" in collaboration with EY and Montreal NewTech, offering specialized pricing to foster ecosystem engagement.

Founder & Community Manager · The Growth Hub

Vancouver / Montréal · 2021 to Present

- **Space Creation:** Founded a collaborative living space for entrepreneurs designed to foster innovation, partnership development and shared growth. Operated two properties of 5 to 10 bedrooms each at 96% average occupancy over 3 years, housing residents from 10+ nationalities. Now running at reduced, largely passive scale.
- **Member Selection and Experience Design:** Built the resident pipeline, attracting 300+ applicants and conducting 50+ interviews to select for entrepreneurial potential and cultural fit. Designed each home's interior, furniture, decor and layout to support collaboration.
- **Incubation Outcomes:** Four companies were started by residents during my involvement, one of which has passed \$100K in revenue.

Co-founder & Co-director · Relmage17

National (Canada) · 2019 to 2021

- **Venture Creation:** Created Relmage17 to build spaces and communication channels around the 17 Sustainable Development Goals in Canada. Developed the organization's strategic framework, revenue model and branding.
- **Program Design:** Developed and co-led Relmage17's consulting program, designed to support Canadian universities in embedding sustainable practices aligned with the UN's Sustainable Development Goals by fostering campus-wide "Alliances" and building collaborative ESG frameworks.
- **Team and Operations:** Managed a team of up to 14 people at peak, mostly part time, including hiring, strategic planning, product development, partnerships and general accounting.
- **Funding Pipeline:** Established a long-term funding pipeline by negotiating a partnership with the Foundation for Environmental Stewardship, enabling Relmage17 to accept charitable donations, resulting in \$300K of capital received over 3 years.

Youth Innovator · MaRS Discovery District (MyStartr)

Toronto · 2020 to 2021

- **Product Testing and Research:** Conducted UI/UX testing on MyStartr's employment platform and led design thinking workshops with youth and employers to identify improvements in user experience and accessibility. Designed and tested pilot products with consumers, and guided iterative platform changes from user feedback.
- **Design Facilitation:** Hosted design events with stakeholders ranging from youth to CEOs, and developed and implemented a content and skill-learning program.
- **Strategy and Executive Advisory:** Informed the development of the organizational strategy for the next 5 years, and advised MaRS' CPO, COO and CEO on how to better engage youth and attract better and more diverse talent.

SKILLS

Product User discovery and interviews, workflow mapping, spec writing, prioritization, launch and adoption measurement

AI Claude Code and Claude API as build layer, LLM integration into production workflows, agentic tooling, prompt design

Systems HubSpot, Salesforce, ActiveCampaign, Notion, Zapier, Bubble.io, Webflow, Shopify

Languages French (first language), English (native level), Japanese (intermediate)
